# Daylighted Wimbledon Park Brook 'At Work'

2

## Thursday 25<sup>th</sup> August 2022

---

- 1) After the drought some heavy rain.
- 2) How did the daylighted Wimbledon Park Brook cope?

3

Lake water over the weir  
then under the first bridge  
and on its way to River  
Wandle

---

4

Some water goes into the café pond, but most continues into the water garden.

---

5

Then past the café whilst  
the pond overflows into  
the culvert under café.

---

6

Into the water garden to fourth bridge

---

7

And onto & under fifth bridge where debris needs to be cleared.

8 From under café  
and under sixth  
bridge to exit  
under railway  
embankment & on  
to River Wandle.

---

- 9 The rain stops and a few hours later the level here drops significantly.
- 

Finally rain water flowing south forms new puddles at Revelstoke Road entrance
